

The door to discovery!

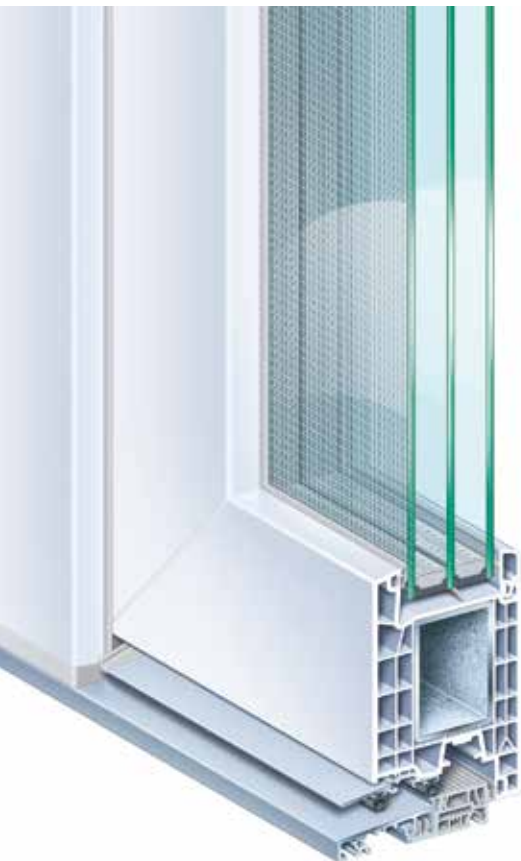

KÖMMERLING 76

Residential door system

DISCOVER A GREATER QUALITY OF LIVING.

The front door of your home is part of your living environment and should reflect your own personal design preferences. It's important to take that into account when you choose a door system. KÖMMERLING 76 is the perfect choice and it enhances your quality of life.

Your dream door.

KÖMMERLING 76 is a prestigious inward or outward opening residential door system that meets every requirement.

The five chamber system provides optimum insulation against cold and heat. KÖMMERLING 76 residential doors also deliver excellent basic security features. Generously dimensioned steel reinforcements provide a strong, closed frame. The corners are reinforced by welded corner connectors that are tightly connected to the steel reinforcement. They absorb bending and twisting forces - e.g. during attempted break-ins - and release them along the entire surrounding steel frame. Special fittings further enhance security.

KÖMMERLING 76

Residential door system.

- **Highly insulating residential door system with 76 mm construction depth.**
- **5-chamber design with max. dimensioned steel reinforcement and welded corner connectors for high static stability.**
